If you miss more than two lab periods for any reason, you earn a failing grade in course.

Programmable calculators are not allowed for midterm or final exams.

There are no make-up midterms. If you miss a midterm examination for a valid reason, the points are transferred to the value of the final exam.

The goals of this course are to solidify and build upon the concepts of chemical structure and bonding for main group elements presented in CHEM 2303, and to introduce computational chemistry.

The topics covered in this course include:

1. Review of Inorganic Fundamentals
2. Symmetry and Group Theory
3. Molecular Orbital Theory
4. Advanced Molecular Orbital Theory
5. Computational Chemistry
6. Main Group Chemistry (Development and Current Research Areas)

Fit to Learn Policy

Students are required to show up to laboratory (lab) and lecture at Acadia University in a mental and physical state suitable for learning. This means they must not be impaired due to sources such as (but not limited to) marijuana, prescription drugs, alcohol, severe lack of sleep or any other cause that may compromise the safety and/or learning potential for themselves or other students.

The instructor has the right to remove anyone from the lab setting that they feel is exhibiting signs of impairment with likely grade implications.
